Nowadays, people are not only accustomed to over-refined foods but are also exposed to various external environmental pollution, radiation and so on. These factors have led people to be unable to get sufficient and the right nutrients from their daily diet. It has also been determined that the degree of cell and genetic damage is significantly larger today than those who lived in the early 19th century.

Cryptomonadales is a new species of algae. It is considered as "The King of Algae" because it has the highest nutritional value among the algae families. It contains essential nutrients needed by the human body such as amino acids, vitamins, minerals, chlorophyll, beta-carotene, cell growth factors, phycocyanin etc, and thus it is able to fully replenish nutrient deficiencies in our daily diets.

Most important of all is the fact that Cryptomonadales contains the precious PPARs activators. These active components act as an agent for cell activation through gene modulations. It can trigger the body cells to function effectively and reboot gene activities against diseases. PEPAR LIFE contains 100% Cryptomonadales, it is a natural green health product that provides "zero" burden to the body. It is also able to provide vital nutrients to meet our daily needs and at the same time provide PPARs activators to ensure better cell function.

现代人不仅要面对加工食品的精制化，同时也要面对外在环境的污染、辐射等。这些因素不但导致人们无法摄取足够及正确的营养素，而且细胞及基因受损程度也比19世纪初的人们来得更多。

引藻是新品种的藻类，因其营养价值更甚于其它藻类，可被称为“藻中之王”。它富含人体所需的营养元素如多种氨基酸、维他命、矿物质、叶绿素、β胡萝卜素、引藻生长因子、藻蓝蛋白等，能够完整弥补人们在日常饮食上的不足。

最重要的是，引藻富含珍贵的PPARs活化剂。这活性成分就像是细胞的活化剂，启动细胞内的基因活动，让沉睡的细胞苏醒并发挥应有的作用，对抗外来疾病。
